

Internship in Automation Technology / Digitalization (m/f/d)

INVITE GmbH is a public-private partnership between Bayer AG, the Technical University of Dortmund, and Heinrich Heine University Düsseldorf. INVITE serves as an open research and development platform that develops, demonstrates, and validates innovative production concepts for the chemical and pharmaceutical industries. We are looking for support in the field of automation for our current research projects. Become part of our dedicated team and actively shape the future of automation!

What we offer

During your internship, you will gain insight into scientifically and industrially relevant topics and have the opportunity to actively participate in the development of new solutions.

You will benefit from:

- A modern and innovative working environment
- Flexible working hours
- An attractive compensation
- Individual mentoring and the opportunity to contribute your own ideas
- Possibility to support or work on a thesis project after the completion of the internship

Your tasks and areas of learning

- Support in research, development, and project implementation in the areas of digitalization, new industrial technologies, laboratory automation, and data structuring.
- Investigation and optimization of new workflows based on internal requirements or customer needs from the chemical and pharmaceutical industries.
- Project management tasks with existing and new project stakeholders from various industrial sectors.
- Preparation and maintenance of technical documentation
- Participation in the management and organization of R&D projects in interdisciplinary teams.

Who you are

- Currently pursuing bachelor's or master's degree program in engineering or information technology
- Strong German and English language skills, both spoken and written.
- Willingness to learn new topics, work intensively in teams, and a passion for technical innovations.
- Proactive, self-directed working style with a focus on goals and solutions.
- Knowledge in industrial control technologies and initial experience in Industry 4.0 or databases is advantageous.

INVITE is committed to fostering an inclusive and diverse workplace and therefore encourages applications from qualified candidates of all genders and backgrounds.

Contact

Please apply online with your complete application documents (cover letter, CV, certificates).

If you have any questions, feel free to contact Mr. Jan Wiggeshoff (wiggeshoff@invite-research.com). We look forward to your application!
