

Accelerate Utilization of Modern Robotics within our industry

In some of our companies, "RoadMapping" activities on robotics are currently taking place. Many see this as a great tool to overcome the barriers hindering strategic advances automation.

On December 9th we meet online to share and discuss experiences in RoadMapping activities:

- Colleagues from Takeda, Bayer and INVITE will present examples from lab, biotech and API production
- and we mutually share experiences in execution of RoadMapping activities as well as identify common application goals.

When, where and how

Dec 9th

15:00-16:30 CET

TEAMS

About INVITE

INVITE is a **Public-private partnership** of Bayer, TU Dortmund University, and HHU Düsseldorf founded in 2010.

Experts bridge the remaining gap between academic insights and industrial applications. INVITE is the

- // **research center** for innovative production technologies with a focus on smart automation, formulation technology and sustainability.
- // leads the **Drug Delivery Innovation Center**,  an **open consortium** between partners from the pharmaceutical industry, machine and service providers, and academia.
